!
!    The following is am mdl structure definition for building
!       a linked list of comments for an sdl generation.  Comments
!       are not allowed outside an sdl module declaration, but
!       several msg files have comment blocks before the .FACILITY
!       declaration.  These comments must be saved until the
!       .FACILITY declaration enables sdlgen to create a module
!       definition.
